

This listing of claims will replace all prior versions and listings of claims in the application.

**Listing of Claims:**

1(original). A fish feed comprising a live feed component which has been fed with an acylglycerol composition which comprises mono and/or diacylglycerols of at least one fatty acid selected from eicosapentaeneoic acid and docosahexaeneoic acid.

2(original). A fish feed as claimed in claim 1 wherein the content of said mono and/or diacylglycerols is at least 45% wt of the total acylglycerol content.

3(currently amended). A fish feed as claimed in ~~either one of claims 1 or 2~~ claim 1 wherein said fish are flatfish larvae.

4(original). A process for the preparation of fish feed, said process comprising contacting an acylglycerol composition and a live feed component characterised in that said acylglycerol composition comprises mono and/or diacylglycerols of at least one fatty acid selected from eicosapentaeneoic acid and docosahexaeneoic acid.

5(original). A process as claimed in claim 4 wherein the content of said mono and/or diacylglycerols is at least 45% wt of the total acylglycerol content.

6(currently amended). A process as claimed in ~~either one of claims 4 or 5~~ claim 4 wherein said acylglycerol composition comprises at least mono and diacylglycerols containing EPA and/or DHA residues.

7(currently amended). A process as claimed in ~~any one of claims 4 to 6~~ claim 4 wherein said acylglycerol composition contains acylglycerols having arachidonic acid (AA) residues.

8(currently amended). A process as claimed in ~~any one of claims 4 to 7~~ claim 4 wherein said acylglycerol is fed to said live feed component at a concentration of about 0.05 to 0.10 g/l.

Claim 9(canceled).

10(original). A method of raising fish comprising feeding fish or fish larvae with an acylglycerol-containing feed, characterized in that said acylglycerol comprises mono and/or diacylglycerols containing EPA and/or DHA residues.

11(original). A method of raising fish comprising feeding filter-feeding fish with an acylglycerol containing feed, characterized in that said feed comprises an oil-in-water emulsion containing mono and/or diacylglycerols of at least one fatty acid selected from EPA and DHA.

12(original). An aquatic animal organism having a maximum dimension of 2mm and having in its digestive tracts mono and/or diacylglycerols containing EPA and/or DHA residues.

13(original). Milk powder containing mono and/or diacylglycerols containing EPA and/or DHA residues.

14(original). Puréed cooked fruit, meat or vegetable containing mono and/or diacylglycerols containing EPA and/or DHA residues.

15(original). A diacylglycerol wherein both fatty acid groups are EPA, DHA and/or AA residues.
